

Specification Sheet

Metal Wheelie Bin-1100 Litre

Dimensions

Capacity:

1100L

Dimensions:

W127 x H138 x D100cm

Other

Material:

Galvanized Steel

Structure:

Pressed steel body adds strength and durability and prevents damage from the lifting vehicle's mechanism. Fully welded internal seams prevent the ingress of water and waste and protects the container from premature corrosion between body panels

Transportation:

4x castors with bracket strengthening ribs help to prevent wheel buckling or castor failure. Danish manoeuvring handles make moving an empty or fully loaded container easier.

Protection:

Recessed buffer plates protect front container panel from being damaged by the vehicle's lifting mechanism

Durability:

Deep pressings in each corner and an extra thick tubing around the rim of the bin offers extra rigidity and protects the container from distorting

Compatibility:

Designed for use with comb lifting devices

Finish:

Hot dip galvanized after manufacture
